Year 2 Science Discovery Dome Incursion
Friday 19 May 2023

Dear **Parents/Guardians**,

Throughout Term 1 and 2 in Science, Year 2 students have been exploring the area of Earth and Space Science learning about the solar system, exploring celestial objects and observing patterns in our sky.

On **Friday 19 May 2023**, students will participate in an engaging interactive incursion, the 'Science Discovery Dome', on campus.

Students will have an opportunity to observe an interactive presentation and contribute to discussions about Night and Day, Earth Rotation and Revolution, Structures of the Solar System, Moon Phases and Star Constellations.

Year 2 Students will experience an interactive tour of the night sky: stars, planets, and major constellations. The night sky is displayed over the ceiling of the dome and is accurate for date, time, and location.

Please complete the following permissions below before **Friday 12 May 2023**

Yours sincerely,

Jade Jones
Year 2 Science Teacher

Lisa Foster
Assistant Principal
Head of Junior School
